AB Molded foam articles are prepared by coating foamed plastic particles with a protective, fire-resistant coating and mixing them with an exothermic polyurethane foam composition so that the heat from the reaction hardens the protective layer. Thus, an Al foil was covered with a foamable polyurethane reaction mixture. Immediately, silicate-coated polystyrene [9003-53-6] foam particles were poured on the reaction mixture in the desired thickness, and a 2nd layer of the foamable composition was applied on top, followed by another Al foil. The assembly was foamed and molded.
 ST polystyrene particle polyurethane foam composite
 IT Urethane polymers, uses and miscellaneous
 RL: TEM (Technical or engineered material use); USES (Uses)
 (cellular, composites with silicate-coated polystyrene foam particles)
 IT Silicates, uses and miscellaneous
 RL: USES (Uses)
 (coatings, on polystyrene foam particles, composites with polyurethane foams)
 IT Plastics, molded
 RL: USES (Uses)
 (polyurethane foam-silicate-coated polystyrene foam particle composites)
 IT Coating materials
 (silicates, on polystyrene foam particles, composites with polyurethane foams)
 IT 9003-53-6
 RL: TEM (Technical or engineered material use); USES (Uses)
 (cellular, particles, silicate-coated, composites with polyurethane foams)
